

SET 43 (Util Package)

1. Write a program to Estimate the Pearson correlation between the two entities using ArrayList
2. Write a program to estimate the Unique elements in an ArrayList using HashSet
3. Write a program to estimate the frequency of elements in an ArrayList
4. Write a program to estimate the TF-IDF of 3 Document String using ArrayList
5. Write a program to Estimate the Linear Regression using ArrayList
6. Write program to perform the K-nearest neighbor classification using ArrayList
7. Write program to perform the K-Means clustering using ArrayList
8. Write a program to estimate the most important attribute of a dataset based on the frequency estimation using ArrayList
9. Write a program to Label the data of an Dataset using ArrayList
10. Write a program to Preprocess a DataSet on String attribute (Stopword removal, Special Symbol Removal and stemming)
